Pressure regulator
Optima E-Flush
At a glance:
LUBING Pressure regulator Optima E-Flush

Pressure regulator with actuator for automatic flushing
The optional screw-in actuator allows automatic flushing of the drinker line: The LUBING flush control „LCW Touch Control“ switches successively, the actuators, which open the integrated flush valve of the pressure regulator Optima E-Flush. The required voltage is provided by LCW controller uniformly in 24 V DC. The cable length of the actuators of 7.5 m ensures a flexible handling. The manual flushing remains possible also with actuator.

Optional accessories:
[3] Transition piece to 3/4“ tube:  
Art. No. 3306-00
[4] Transition piece to 3/4“ round pipe:  
Art. No. 3305-00

All pressure regulators can also be equipped with 600 mm (-6) [9] and 900 mm (-9) [10] breathers instead of the standard breather 450 mm [8]. Extend for this the item number with the appropriate version number (-6 or -9) before last number block (-00). Example: 3254-02-6-00
